

EQUIPMENT RIDER

*by Christopher Sealey*

## EQUIPMENT OVERVIEW

Christopher Sealey performs using a Serato DJ Pro setup.

The below equipment list assumes plugging in to a venue sound system via XLR master output directly from the below DJ mixer. Unless the venue has an advance sound system, additional speaker rentals will be necessary.

## NO SUBSTITUTIONS

To ensure a quality performance it is vital that the equipment setup is exactly as described in this rider. Equipment brands, makes or models other than those listed here will not be considered suitable without prior written authorization from Christopher.

## ROLES AND RESPONSIBILITIES

Equipment setup, quality assurance, and breakdown is the sole responsibility of the equipment vendor. Christopher will be available for a pre-event sound check one hour before performance start time.
